Career Objective

Full Stack Developer with strong expertise in **JavaScript, React.js, Node.js, and RESTful API development**. Experienced in building **scalable web applications, secure authentication systems, and database-driven platforms**. Strong foundation in **Data Structures, OOPS, DBMS, and Software Development Lifecycle (SDLC)**. Passionate about developing responsive, high-performance, and cloud-ready applications.

Education

B.Tech – Computer Science	ANITS Engineering College CGPA: 8.7/10	2024 – 2027
Diploma – Computer Science	State Board of Technical Education Percentage:85%	2021 – 2024

Technical Skills

Frontend Development: React.js, HTML5, CSS3, JavaScript, Responsive Web Design.

Backend Development: Node.js, Express.js, REST APIs, Authentication & Authorization.

Databases: MongoDB, MySQL, SQL

Programming Languages: Java, Python, JavaScript, C, C++

Cloud & Tools: AWS, Firebase Authentication, Git, GitHub, VS Code .

Core Computer Science: Data Structures & Algorithms (DSA), OOPS, DBMS, Operating Systems, Computer Networks.

Experience

Machine Learning Intern – SkillDzire (Remote) May 2025 – Jun 2025

Developed and deployed Machine Learning models using Python, integrating them into scalable Full Stack web applications REST APIs. Built backend logic with Node.js, handled data processing pipelines, and collaborated using Git for version control and agile development workflows.

Ethical Hacking Workshop

Completed intensive training in Cybersecurity, Ethical Hacking, and Penetration Testing, including Vulnerability Assessment, Network Security Analysis, and System Exploitation Techniques. Gained hands-on experience with security tools and methodologies aligned with OWASP and Information Security best practices.

Projects

Age and Gender Detection System 2025 [\[CODE\]](#) [\[LiveDemo\]](#)

Developed a Full Stack web application using React.js, Node.js, REST APIs, Python, OpenCV , and CNN for real-time face detection and age-gender classification. Implemented backend API integration, model inference pipeline, and deployed as a live, scalable web-based system.

AI-Resume Analyzer 2025 [\[CODE\]](#) [\[LiveDemo\]](#)

Developed a Full Stack ATS Resume Analyzer using **React.js, Node.js, Python, NLP, and REST APIs** to evaluate ATS scores, perform keyword analysis, and identify skill gaps. Implemented backend API integration, resume parsing, and deployed as a secure, database-driven web application.

AI Image Generator 2026 [\[CODE\]](#) [\[LiveDemo\]](#)

Built a Full Stack AI web application using **React.js, Node.js, Python, PyTorch, and Stable Diffusion** to generate high-quality images from text prompts. Implemented REST API integration, backend model inference, prompt handling, and optimized deployment pipeline for real-time image generation.

Certifications
