

Job Title: Front End Developer Intern

Location: Visakhapatnam

About Us:

Medikloud is an AI-powered Hospital Management System (HMS) SaaS platform that streamlines hospital workflows through intelligent automation and modern digital solutions. We are seeking passionate Front End Developer Interns to join our team in Visakhapatnam and contribute to building scalable, high-performance healthcare applications.

Position Overview:

As a Front End Developer Intern at Medikloud, you will work closely with product designers, backend engineers, and AI teams to develop intuitive, responsive, and scalable user interfaces. This role provides hands-on experience in building production-grade SaaS applications using modern frontend technologies, standardized design systems, and automated development workflows.

Key Responsibilities:

- Develop responsive and high-quality user interfaces using **React** and **Next.js**.
- Build and maintain modern UI components using **Tailwind CSS** and global styling standards.
- Implement **Server-Side Rendering (SSR)** and **Client-Side Rendering (CSR)** for optimized performance and SEO.
- Translate Figma designs into production-ready interfaces with a strong focus on usability and accessibility.
- Enhance and modernize existing web pages using contemporary UI/UX practices.
- Integrate frontend applications with backend APIs and ensure seamless data flow.
- Implement state management using tools such as **Redux**, **Context API**, or **Zustand**.
- Optimize applications through lazy loading, image optimization, and performance best practices.
- Ensure cross-browser compatibility and mobile responsiveness across platforms.
- Contribute to and maintain standardized **design systems**, typography, and reusable components.
- Improve UI/UX across company websites, SaaS products, and digital platforms.
- Implement robust form handling and validations, including structured input and phone number validation.
- Collaborate with cross-functional teams to deliver scalable and secure solutions.
- Participate in code reviews, debugging, and continuous improvement initiatives.

Qualifications:

- Pursuing a **B.Tech/M.Tech in Computer Science, Information Technology, or a related field**.
- Proficiency in **HTML, CSS, JavaScript, and TypeScript**.

- Hands-on experience with **React, Next.js, and Tailwind CSS**.
- Understanding of **SSR, CSR**, and modern frontend architectures.
- Familiarity with **state management tools** such as Redux, Context API, or Zustand.
- Experience integrating **RESTful APIs** into frontend applications.
- Strong understanding of **responsive design**, modern UI/UX principles, and accessibility.
- Knowledge of **design systems**, typography, and reusable component development.
- Experience with **Tailwind CSS configuration** and global styling practices.
- Familiarity with **performance optimization techniques** such as lazy loading and image optimization.
- Understanding of **SEO best practices** and web performance metrics.
- Proficiency with **Git** and collaborative development workflows.
- Experience with **Figma** or similar design tools.
- Exposure to deployment platforms such as **Vercel** is a plus.
- Experience with **AI-assisted coding tools** (Cursor, Replit, Windsurf, GitHub Copilot, etc.) is an added advantage.

Additional Information:

- Full-time is preferred.
- Hands-on experience in building real-world AI-driven healthcare SaaS products.
- Opportunity to work in a fast-paced startup environment with modern engineering practices.
- Outstanding interns will receive a **Letter of Recommendation** and a **Pre-Placement Offer (PPO)**.
